Part Number Consolidation from FCI and Anytek Offer

Dear Valuable Channel Partner,

Following the integration of the full product offer of our acquired company Anytek into the FCI product portfolio, we are please to inform you that, in order to have a better logistic management and better responsiveness to our customers, we have unified the former FCI part number starting with 200 into the same Anytek's part number structure adding the J0G postfix as per the enclosed cross reference table attached.

The products are absolutely the same in terms of technical specification and fit and form as you can verify from our Product Specification available in our WEB site.

Please feel free to contact us for any further details you may need.

Best Regards.
